

- *"Referential Indexing of Pictorial Sources Containing Musical Instruments"* with Dr. Khosrow Moulana, in: Honar-ha-ye-Ziba no.13, spring 2003, pp. 118-130.

**Abstract:**

A method for referential identification and indexing of pictorial sources containing musical instruments is outlined here. The method, based upon the date of origin of the source, has been used on a developing basis during past years. The index acting as a "pictorial reference" should play a significant role in overcoming the obstacles that have impeded musical research. The structure of the method is also such that can easily be adopted in other fields of research.
